# Module 31:
Farewell

Data Processing Pipeline

Localization

- Determine which regions of the brain are active during a specific task.

# Connectivity

- Determine how different brain regions are connected with one another.

Cribben et al. (2012)

Prediction

- Use a person's brain activity to predict their response or disease status.

Classifier Pattern

Brain Activity → Cross-product → Predicted Response 5.3

Wager et al. (2013)

Thanks

- Tor Wager, University of Colorado at Boulder
- Ira Gooding, Johns Hopkins University
- Brian Caffo, Johns Hopkins University
- Roger Peng, Johns Hopkins University
- Jeff Leek, Johns Hopkins University

- Donald McLaren
- Aimi Watanabe

- All participants in the course!
